INTRODUCING THE ACCUPRINTER™ FOR BRANDING OF EGGS AND TRACEBACK

MEYHEN-HPT is now offering the ACCUPRINTER™ to imprint eggs with a logo or up to four lines of text or numeric data at a cost approximating 0.5 cents per dozen.

The ACCUPRINTER™ offers brand identification and positive trace-back for product differentiation from generics and for enhanced consumer assurance of safety.

Imprints including logos and text can be changed using a hand-held pad with remote wireless connectivity. Different imprints can be selected for specific packers depending on product.

FDA-approved red and pink ink cartridges are currently available. ACCUPRINTER™ inks are impermeable to moisture and imprints will not smudge if post-pack condensation occurs.

The ACCUPRINTER™ is compatible with MOBA, Diamond and Staalkat packers and can be relocated within minutes using pre-mounted brackets and connectors.

Specially designed cartridges provide approximately 200,000 imprints and are available at either \$85 or \$95 depending on contract option.

Two alternative contract options are offered to suit the requirements of a packing plant with respect to product range and volume:-
